SUBJECT INDEX

A

ABSORPTION
air conditioner, design 180
apparatus, evolution measurements 184
arsenical compounds, removal 13
CO_2 absorption 183
CO_2 from cracked gases 273
cooling towers, cyclone-foam apparatus 293
diffusion coefficients, mass spectra 104
diffusion coefficients, CO_2, C_2H_4, C_3H_6 and C_4H_8, in H_2O 298
electrokinetic, energy conversion 266
fail-safe controls, plant operation 378
fluor solvent, plant operation 164
gas hydrates, arrangement 235
gas, spray tower 104
gas-phase dosimetry, ionization measurements 286
gas purification 81
hydrocarbon analysis 410
incandescent furnace 358
mixtures, thermal diffusion factors, diffusion coefficients 104
natural gas absorber 218, 231
radiation effects, boundary-layer flow 453
radiation model 184
refrigerating system 246
refrigeration, apparatus 289
sulfur dioxide removal 394
tracer analyser 183
turbulent contact absorber 27

ACETONITRILE
consumption, production 175

ACETYLENE
burner 49
catalytic hydrogenation 172, 240
derivatives, methylacetylene production 438
dissociation energy 104
ethylene production 401
explosive properties 399
infrared spectra 187
oxidation 171
petrochemicals, production from acrylic acid and ethyl acrylate 176
petrochemical production 403, 433
production 88, 403
production, Orbach process 49
production, radiation effect 244, 438
polymerization, 399

ACRYLONITRILE
build-up in Europe 206

ACTIVATED CARBON
gas-solid interaction potentials 184

ADIABETIC MEASUREMENTS
thermal conductivity, correction 408

ADSORPTION
CO, CO_2, chemisorption 185
charcoal trap 447
electrode, pore measurements 410
ethane, C_2H_4, surface energy 144
low temperature gas processing 82
infra-red cell, analytical studies 451
gas-solid interaction potentials 184
gases, surface migration 411
helium recovery 79
hydrocarbons, oxidation 438
hydrogen, low temperatures 242
hydrogen, on tungsten and Ni 185
hydrogen, O_2 239, 280
mass transfer, fixed bed 220
methane 145
mixtures separation 88
nitrogen, Ar, C F_4 and C_2H_6, on polypropylene 410
silica gel 185
sulfur dioxide removal 394
thermionics, in gas 270
unit, dehydration capacity 357

AIR
annealling tubes 250
blower, printing 212
butane/air, coal gas conversion, Great Britain 245
compressor, peak shave plant 234
curtain, Great Britain 211, 250
distribution network 287
drying, football field, Grey Cup 97
engine, Stirling 225
flashback, premixed flames 67
hydrogen-purification, device 353
industrial processing 250
plant heat, CO-RAY-VAC 99
production, town gas, reforming plant 347
propane-air gas 404
sonic hammer, pile driver 228
storage, peaking gas turbine 195

AIR BLAST
burners 181, 248

AIR CONDITIONING
adsorption, refrigerating system 246
air conditioner, design 180, 192
air conditioner, submarine application 119
air conditioner, water cooled 56
air heater, kitchen ventilation 370
apartments 247, 405, 407
centralized control 247
climate control 346, 370
competition, gas, electricity, oil 247
consumption, N.Y. World's Fair 109, 153, 155
design, cost analysis 137
design, pressurized combustion chamber 441
electronic gear protection 247
market potential 405, 441
refrigerant, bicarbonate solution 138
refrigeration, total energy 77, 289
refrigerators, operational cost data 138
sales, 1963 56
space cooling, department store 210
space cooling, motel 247
space heating, office fallout shelter 158, 247
turbo-power 442
weather data, load costs 210
work, through compressed gas 83

AIR POLLUTION
catalysts, CO-C_2H_4 mixtures, oxidation 405
chimney design 97
coal gas, Great Britain 24, 97
control 56, 138, 294, 371, 427
control, petroleum refining 56
filter system, biological 148
fume control, catalytic combustion 370
gas cleaner, iron oxide recovery 97
gasfired incinerator 97
gas sampling apparatus 63, 377
properties, fly ash uses 97

ALASKA
drilling platform, Cook Inlet, Alaska 164
emergency power, turbines 202
oil industry, Alaskan quake 154

ALUMINA
catalysts studies, flash desorption 29
parahydrogen catalyst 238

ALUMINUM
adsorption gases on Raney Ni 185
alloy corrosion, cathodic currents 449
alloys, construction materials 450
alloys, corrosion fatigue 449
fertilizing industry 254
methane storage, Canvey Island 48
pipe 85
precision casting 213

AMMONIA
acid cleaning, static NH_3, washers 80
anhydrous N_2 production 89
catalytic destruction 399
chemical capacity, U. S. Steel 365
detergent capacities 171
detergents, intermediates 22
diffusion, turbulent boundary layer 411
distribution 89
fertilizer industry 254, 399
fuel cell 157
fuel internal combustion engine 350
hydrogen cyanide, from CH_3OH, NH_3, O_2 402

Services Available to GAS ABSTRACTS Readers

Photocopies

Photocopies of all articles abstracted in *Gas Abstracts*, except those enumerated here, are available from the Institute at cost:*

1) Russian Articles.—Abstracts are obtained from services specializing in this field. English translations can be supplied by arrangement with the appropriate abstractor.
2) U.S. Patents.—Printed copies can be secured at 25 cents each (remittance with order) from the Commissioner of Patents, Washington 25, D.C.
3) Books, Special Reports.—When a price is given in the abstract, these should be secured from a bookdealer or the publisher; when stated *free*, from the publisher.

Types of Photocopies

Depending on the "tightness" of the binding (which determines whether pages can be laid flat without breaking the binding), and the color of the paper and ink used in the original being copied, photo-copies may take any of several forms:

1. Positive paper prints made by the reflex process.
2. Positive paper prints enlarged by xerography from microfilm negatives.
3. Negative photostats.
4. Positive photostats.

Choice of the method used must necessarily rest with the Institute. All photocopies are approximately the same size as the original material.

Cost of Service

The photocopy service charge is:

First 5 pages or fraction thereof of one article in one issue $1.50

Each subsequent 4 pages or fraction thereof of the above one article in the same issue $1.00

Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Microfilm

Microfilm copies of articles abstracted in *Gas Abstracts* are likewise available at cost.* The material is photographed on 35 mm unperforated negative film at 5¢ per page, with a minimum of 50 pages, $2.50, per order. Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Bibliographies and Literature Searches

The library will prepare bibliographies and make literature searches on a cost basis plus a service charge. A comprehensive statement detailing the problem must be presented with the request.

Gas Abstracts on Cards

The abstracts in each monthly issue are also printed individually on 5 x 8-inch cards. Each card bears at its top the author and subject headings under which it may be filed. As many copies of each card are supplied as there are headings on that card, enabling filing of the abstract under all of its headings, eliminating cross-indexing.

The annual subscription to *Gas Abstracts on Cards*, a mailing of 500-1000 cards each month, is $120.00 to U. S. addresses, $150.00 foreign.

Since the printing order for cards is based on the current number of subscribers, a subscription for this service commences with the month in which the order is received. Back numbers of *Gas Abstracts on Cards* are not available.

Back Numbers of Gas Abstracts

In response to an increasing number of requests from utilities, colleges, and technical libraries which have only recently learned of the reference value of *Gas Abstracts*, the Institute has taken steps to make available single numbers, volumes, or complete files of this publication to date, starting with Vols. 1 (1945) and 2 (1946), some numbers of which are out of print.

The latter numbers are reproduced by a photoprinting process from copies in the Institute's libraries, and Vols. 1 and 2 can now be purchased at $35 per volume, unbound; single monthly numbers are offered at $3 each.

Vols. 3 to date are available at current subscription prices, $25 per volume to U.S. addresses, $30 foreign. Monthly numbers are $3 each.

*In requesting and accepting photocopies or microfilm copies, the applicant agrees to the following:

1. The applicant desires this duplication solely for use in lieu of loan or manual transcription. Responsibility for questions of copyright that might arise in this copying, and, in the use of the copies, is assumed by the applicant.

2. The applicant understands that the Institute does not sell the photocopies, but merely performs the service of copying at the applicant's request; the fee paid is exclusively for such service and is established on the basis of no profit to the Institute.

3. The Institute reserves the right, at its own discretion, to decline to make photocopies requested, or to limit the number of copies, within the principle of fair use of copyrighted material.
